Vermont Deaf, Hard of Hearing, DeafBlind & Visually Impaired Services Programs as of 09/18/2023 11:45 am

ASL Video

Introduction

This is a comparison of programs serving Deaf, Hard of Hearing, DeafBlind (DHHDB) and Visually Impaired Vermonters 0 to 22 years. Each program has provided information about who they serve, their services, and how to reach them.

Definition of Service Delivery Approaches

Direct Services are student centered and specially designed instruction and/or supplementary instruction provided directly to a child by a special education teacher or related services professional. Direct service can be provided to an individual child or to a small group of children with similar needs. Direct instruction and services are provided to help a child meet the goals and objectives on the child's Individualized Education Program (IEP) and 504 Pans. For example, a special education teacher could provide direct service in written language instruction to address a goal for written language.

Consultation Services/Technical Assistance to support the team and/or student. A special education teacher or related service professional provides these services to others who are working directly with a child. Indirect services may include activities such as:

- Staff consultation with a regular education teacher or other school staff on situations resulting from a child's disability
- Modifying curriculum or environment for a child
- Observing a child
- Monitoring a child's progress in a specific area
- Monitoring equipment or assistive technology used by a child
- Coaching a provider to implement a specific instructional strategy
- Services can also be provided to families or support staff working with students, for example sign language instruction or braille instruction.
- Technical Assistance Services (TA) involves assistance to local or state agencies/programs (rather than to individuals) and generally involves problem solving and collaboration to achieve a mutually agreed upon goal. Technical assistance may involve multiple contacts and interactions over an extended period of time. TA is a form of consulting and may also include coaching.
- Indirect services (not student centered) can also be provided to families or support staff working with students, for example sign language instruction or braille instruction or making sure student staff understand how assistive technology is working

Training/Professional Development Services (webinars, workshops/conferences, learning communities) is designed to teach, present or guide individuals in order to impart knowledge, skills and competencies. In some cases, training may be a component of TA, a part of the process to improve performance, resolve problems, and/or increase capacity.

Agreements are created between the agencies and the schools based on the agreed services and costs.

Organization	UVMMC		UVM-CDCI ⁱ			NEC"	VABVI ⁱⁱⁱ
Program	Early Intervention & Parent Infant Program (PIP)	Deaf, Hard of Hearing, DeafBlind Educational Services Program (DHHDBESP)	CARES (Consultation, Access, Resources, and Equipment Support) Team	I-Team	I-Team Early Intervention	Federal Technical Assistance - DeafBlind	Educational and Rehabilitation Services
Ages served	0 to 3 years	3-22 years	3 to 22 years	3 to 22 years	0 to 3 years	0 to 22 years	All ages (birth to death)
Number of children and students served	On average, 22 at any point in time	Approximately 208 student services	Approximately 345	Approximatel y 180 annually	Approximately 15-20 annually	Approximately 35- 40 annually	Approximately 300 children annually

Focus of services	Children who are Deaf, Hard of Hearing, and DeafBlind (DHHDB)	Provide child centered, evidence based specialized and equitable services to students who are DHHDB or have additional communication needs across the state of VT.	Students who are DHHDB	Students with complex support needs, which may or may not include DHHDB	Infants and toddlers with complex medical and developmental needs which may or may not include DHHDB	Children who are DeafBlind	Children and adults who are blind or visually impaired which may or may not include DHHDB
-------------------	---	--	---------------------------	---	--	-------------------------------	--

Program Purpose	Provide specialized Early Intervention services, information, and support for families with children (age 0 to 3) who are DHHDB.	Students 3-22 with a documented hearing loss or a need for a visual/manual language to supplement communication, enrolled in Vermont schools.	Consultative services on access, resources and equipment support for teams serving students who are DHHDB Collect statewide data on student needs and services accessed	Consultative services for teams serving students with complex support needs, which may or may not include students who are DHHDB.	Increase provider and family knowledge and skill in working with infants and toddlers (0-3) with complex medical and developmental needs, which may or may not include children who are DHHDB	Provide consultation & training to families and service providers around the unique needs of individuals with combined vision and hearing loss (deafblindness) Maintain federal child count of all VT children with deafblindness to report annually	Provide services to individuals of all ages (birth to death) Provide direct, consultation and training services to students, schools, and families. Maintain the APHiv federal quota census of all children with a visual impairment in VT to obtain federal quota funds for materials specific to the visually impaired
--------------------	--	---	--	---	---	---	--

Eligibility	Children 0-3 with: chronic, permanent conductive hearing loss, Sensorineural hearing loss, fluctuating conductive hearing loss lasting 6 months or longer	Students 3-22 who are Deaf, Hard of Hearing, or DeafBlind	Students 3-22 with documented 25 decibel HL threshold (ANSI, 69)° or worse for one or more of the frequencies 250-8000Hz ^{vi} , in one or both ears, as determined by an audiologist, otologist, or otolaryngologist.	Students 3- 22 receiving services through an IEP and has a disability which significantly impacts learning, cognitive functioning, and adaptive behavior. Requires intensive individualized instruction and significant supports to access the general education curriculum	Children 0-3 referred to, or receiving, services through Part C Early Intervention. Must have a complex profile of medical and/or developmental needs that significantly impacts participation in daily activities and routines. Must require significant individualized supports to access their home and community environments.	Children and students 0-22 with a documented combined vision and hearing loss or be at risk. Children do not need a 504 or an IEP to access services. All children with any level of combined vision and hearing loss should be reported to NEC to reflect accurate numbers on the VT Deafblind Child Count	Students 0-22 with a visual acuity ^{vii} of 20/70 or worse in the better eye, or a progressive eye disease, or a field loss of 20 degrees or less, or students who are functioning as visually impaired
-------------	---	--	--	--	--	--	--

Services Offered	Coordinate connections to other parents and resources Coach caregivers about listening and visual strategies that support communication and language within daily routines Share resources around accommodations to increase language access Share unbiased information and facilitate discussions with caregivers relating to language and communication options Support caregiver understanding regarding type, degree, and impact of child's specific hearing levels/loss Provide information about language acquisition and brain development	Sign instruction (families, students, or educational team staff members) Communication facilitation Educational Interpreters Direct instruction from a teacher of the deaf (TOD) ASL evaluations (outside contractor) Consultation and Technical Assistance to students and school teams. ComprehensiveE ducational Audiology Services Speech language pathology: evaluations and services ASL Assessments Hearing Assistive Technology and verification. Summer Services	Technical assistance (consultation) to schools and families to facilitate access to classroom curriculum and instruction. Technical assistance (consultation) to schools and families around child-specific amplification systems; hearing assistive technology: cochlear implants; and student/family audiology services support. Training focused on selfadvocacy skill development and hearing assistive technology use. Training to school teams regarding individual students and general information regarding	Technical Assistance (Consultation), Training- local, regional, or statewide, and available ISE ^{ix} courses Please visit "Request I- Team Services" tab of our website	Technical Assistance (Consultation) and Training- local, regional, or statewide	Technical Assistance (Consultation & Training) available to teams and agencies serving children with combined vision and hearing needs or at risk.	Direct 1:1, consultation, and training services weekly, monthly or annually statewide to support the core curriculum and the 9 Expanded Core Curriculum areas: Braille Instruction Orientation & Mobility Assistive Technology Social Skills Career Education Recreation & Leisure Sensory Awareness Independent Living Self-determination Booklet: Educating Students with Visual Impairments in Vermont

VABVI bills school districts for services for students ages 3-22 depending on the level (hours) of service.

Vermont Family Network (VFN):

As part of the IDEA, each State is required to have a designated Parent Training and Information Center to support parents, guardians, and families who have students with disabilities. In Vermont, our PTIC is Vermont Family Network. For more information on how VFN can help, please visit their website: https://www.vermontfamilynetwork.org/what-we-do/family-support/

Special Education Advisory Panel (SEAP):

As part of the IDEA, each State is required to have a Special Education Advisory Panel comprised of no less than 51% of parent members. The Panel advises the AOE on matters of special education, including unmet needs of children and youth in Vermont. To attend meetings or apply for membership to this Panel, please visit their webpage for agendas, meeting dates and locations, meeting minutes, and resources: https://education.vermont.gov/state-board-councils/special-education-advisory-panel

Agency of Education (AOE) Special Education Website:

Families are invited to explore the Resources for Families section on our Special Education website, in addition to pages dedicated to recent events, news, guidance, and requirements. The AOE Special Education Team is open to feedback on what you would like to see represented so families can consider this a useful tool that meets their needs. https://education.vermont.gov/student-support/vermont-special-education

Agency of Education (AOE):

For any questions or concerns related to special education, the Individualized Education Program (IEP) process, or the provision of IEP services please contact The Agency of Education's Special Education Technical Assistance line. It is available 24 hours/day through the general email and voicemail system. These methods of communication are monitored regularly during business hours and a response is generally provided within 1 business day: AOE.SpecialEd@vermont.gov or (802) 828-1256.

Department of Disabilities, Aging and Independent Living:

For any questions or concerns related regarding to services through any state agencies, contact Laura Siegel. Her email address is: <u>Laura.Siegel@Vermont.gov</u>. Her videophone number is: <u>802-560-5170</u>. Her cell phone number is: 802-904-3241. Her cell phone number is only used for text messages.

¹ UVM-CDCI stands for University of Vermont-Center on Disability and Community Inclusion.

[&]quot;NEC stands for New England Consortium on DeafBlindness.

iii VABVI stands for Vermont Association for the Blind and Visually Impaired.

iv APH stands for American Printing House for the Blind.

^v ANSI stands for American National Standards Institute.
