

Division for the Blind and Visually Impaired

Division Philosophy

DBVI assists individuals who are blind or visually impaired to meet their employment and independence goals. DBVI uses a holistic rehabilitation approach that helps people to meet their goals, build new skills, and improve their circumstances. The goal is for all participants to achieve or sustain economic independence, self-reliance, and social integration consistent with their interests, abilities, and informed choices.

Division Overview

DBVI helps working age individuals achieve economic independence by obtaining livable wage jobs and income. This involves training to improve employment skills and higher education that leads to degrees or certificates. DBVI helps transition high school students from school to the world of work. DBVI's statewide approach for younger students helps to ensure that all blind and visually impaired high school students have pre-employment transition skills. DBVI also helps individuals of all ages to build adaptive skills related to their visual impairment through assistive technology, low vision, orientation and mobility, and independent living skills.

Staff and Partners

DBVI services are provided by highly qualified professionals who possess specialized training and understanding of the implications of visual loss. Services are provided by ten staff from regional field offices in Montpelier, Burlington, Springfield, and Rutland. Each office has a rehabilitation counselor and a rehabilitation associate who ensure that individualized services are delivered. One rehabilitation technology trainer covers the entire state teaching people how to use assistive technology. The Director of DBVI oversees the statewide program.

DBVI partners with several organizations to accomplish our mission. The major provider of direct instruction for teaching blindness related skills is the non-profit Vermont Association for the Blind and Visually Impaired (VABVI). Their staff include certified blindness professionals who are highly trained in the areas of Orientation and Mobility, Low Vision and Rehabilitation Therapists. For other DBVI partners please visit www.dbvi.vermont.gov

Division for the Blind and Visually Impaired

Recent Developments and Accomplishments

This year DBVI organized several events around the state to educate the public about White Cane Safety. The white cane is a symbol of strength and independence for blind and visually impaired people, used by people who are blind as they travel independently. Members of the public received training in safe travel techniques from an Orientation and Mobility Instructor, increasing awareness of what it is like to travel with the white cane.

The main events were in Burlington, Montpelier, and Rutland. Each included a walk guided by an Orientation and Mobility Specialist to demonstrate proper use of the white cane and safe travel techniques. These events are great opportunities to educate the public and to have meaningful discussions about how blind and visually impaired individuals travel within their communities independently.

DBVI staff worked closely as a team this year to accomplish major initiatives. This included updating several policies to reflect the intent of the recent Workforce Innovation and Opportunity Act (WIOA). This Act represents a significant shift towards serving students transitioning to work. This year DBVI staff participated in several regional and statewide events to collaborate and share resources about helping students successfully prepare and enter the workforce.

Another major initiative was the successful rollout of the AWARE automated case management system. This initial design phase was followed by pilot testing, training, and full implementation. This system moves DBVI into compliance with the new WIOA reporting requirements, and will help DBVI staff to efficiently complete their work.

Future Directions

DBVI believes the best path forward includes a solid foundation in technology. Relevant new technologies emerge every day, and our staff stay current to determine the solutions that help our customers achieve their employment and independence goals. Several new products have emerged this year. For example, a new free application was launched this year that allows users to read text by pointing the camera of their phone towards the text. It also can read the bar code on items in a store and read back the contents of the item. Technology helps people to accomplish tasks independently, and DBVI will maintain a strong foundation in new innovations.

Division for the Blind and Visually Impaired

New technologies are exciting and open many new doors; however, DBVI is committed to the importance of the basics such as touch typing and the importance of Braille. These skills are essential for students transitioning to higher education and job training. The Job Readiness Workshops will incorporate opportunities to use these skills in the upcoming year.

DBVI will be piloting some exciting work from home opportunities this year. Our goal is to identify the skills and service products needed by Vermont employers. We will then support specialized training and technology to meet those business needs.

Programs and Services

Vision Rehabilitation Employment Services

The goal of DBVI's vocational rehabilitation services is to help people with vision loss to retain, return, or secure employment. Individuals meet with a DBVI counselor to identify goals and develop a plan to improve their functional independence.

DBVI counselors provide guidance related to employment and help people explore interests and abilities. On their individual path to employment, most people who work with DBVI:

- Build and strengthen vocational skills
- Learn new adaptive skills to remain independent regardless of vision loss
- Learn to use specialized technology needed to do their jobs
- Receive services to maximize visual function
- Help with a job search and provide training in job skills
- Assist with attending college
- Provide technology and training that allow access to printed materials and completing work tasks

DBVI is exceptionally proud of the accomplishments of our customers. To read some success stories of our customers and their experiences with DBVI, visit our website: www.dbvi.vermont.gov.

Services for High School Students

DBVI's transition services provide high school students with opportunities for learning independent living and job skills. DBVI collaborates with several partners

Division for the Blind and Visually Impaired

including the Division of Vocational Rehabilitation (DVR), VABVI, ReSOURCE, and the Gibney Family Foundation. DBVI is also working with partners to make sure

that all blind or visually impaired high school students are building solid pre-employment skills.

The LEAP (Learn, Earn, and Prosper) program provides paid summer employment for youth in a residential setting. LEAP empowers students to take charge of their employment future by gaining early employment success, and helps students make a successful transition from school to work.

Independent Living Services

DBVI helps individuals maintain independence. A DBVI rehabilitation associate meets an individual in his or her own home to discuss the individual's goals and develop a plan to achieve the highest possible degree of independence in activities such as traveling, preparing meals, and managing medications. Direct instruction is provided by certified blindness professionals through a grant agreement with the Vermont Association for the Blind and Visually Impaired (VABVI). VABVI also administers the Older Blind Program to provide specialized vision rehabilitation services, serving 820 individuals over the age of 55 in FFY 2017.

Technology

Effective use of assistive technology is critical for many people with vision loss. DBVI invests significant effort to stay current in new assistive technology to help people with employment, participate in their communities, and eliminate other barriers caused by vision loss.

Results

Performance Measures

Better Off: Our focus is to help our consumers to become better off by building new skills and improving their circumstances.

Employment Rate: DBVI has consistently delivered a high Employment Rate. The percentage of people served by DBVI who have achieved an employment outcome successfully attained a vocational goal for a minimum of 90 days:

Division for the Blind and Visually Impaired

	2012	2013	2014	2015	2016	2017	National Standard
Employment Rate	77%	80%	79%	73%	75%	80%	68.9%

Deliver Services Well: We also have a strong focus on delivering services well. Customer satisfaction is measured regularly in the following key areas. Results from the 2017 statewide customer satisfaction survey:

- 93%--Overall, how satisfied are you with the DBVI vocational rehabilitation program?
- 93%=Overall, I am better off as a result of the services I received from DBVI.
- 95%=DBVI staff treated me with dignity and respect.
- 94%=How helpful were the staff of DBVI in helping you achieve your vocational rehabilitation goals?
- 92%=Considering all of the expectations you may have had about the services provided by DBVI to what extent have these services met your expectations?
- 89%=The DBVI vocational rehabilitation services I received helped me become more independent in general.
- 84%=DBVI helped me reach my job goals.

Our approach for assisting individuals on their path to employment and independence begins with the belief that each person can achieve their goals and DBVI can help. We also know that the “voice of the customer” is important and our strategies are geared to meet the needs of the individual customer. Each staff member is committed to delivering services well and knows that their job makes a difference in the lives of people we serve. Please visit the success story link on the DBVI website at www.dbvi.vermont.gov to see real examples of people reaching their goals.
