Additional specificity re: Personal Protective Equipment (PPE) availability and deployment to Long Term Care providers:

VDH is currently working to deploy available PPE (to include N95 masks, surgical masks, surgical gowns, Tyvek coveralls, face shields, goggles, nitrile gloves) based on requests received via the [PPE Resource Request Form](#) system. Agency of Transportation resources (trucks and personnel) have been deployed to pick up items from the VDH warehouse and deliver to LTC providers starting on Monday; providers will see these on their doorsteps early next week. Of note, providers may not receive the full amount of items requested; the intent is to ensure that all requestors receive an equitable portion of available stock at this time.

For all future requests submitted via the [PPE Resource Request Form](#) system, providers must be sure to select the "Long Term Care" option in the "facility type" drop down, and to be sure to include an exact street address for delivery (do not use a P.O. Box); this will expedite processing/delivery of your request.
